Fund features

- Objective to achieve absolute returns in excess of the benchmark (after fees) over the investment cycle (typically 3-5 years)
- In the absence of finding individual securities that meet minimum risk-return criteria, cash may be held to maximum 25%
- Flexibility to hedge for risk management purposes:
 - Currency exposure of the underlying stock position (net short currency position not permitted)
 - Equity market exposure via exchange traded derivatives (limited to 10% of NAV)
 - Leverage not permitted
- This product is likely to be appropriate for a consumer seeking capital growth to be used as a small allocation within a portfolio where the consumer has a minimum investment timeframe of 5 years, and a high risk/return profile.

⁴ Antipodes classification

⁵ Where possible, regions, countries and currencies classified on a look through basis

⁶ All metrics are based on gross of fee returns in AUD terms since inception. The upside/downside capture ratio is the percentage of benchmark performance captured by the fund during months that the benchmark is up/down. Standard deviation is a measure of risk with a smaller figure indicating lower return volatility. The Sharpe ratio measures returns on a risk adjusted basis with a figure > 1 indicating a higher return than the benchmark for the respective levels of return volatility.
