## Commentary

Global equities were down in April (-1.7%) with Consumer Staples, Energy and Utilities outperforming and Communication Services, Information Technology and Consumer Discretionary underperforming. The downturn was led by US equities, which underperformed broader global markets (-2.6%). The broader de-risking was in response to a more hawkish stance from the Fed and the view battling inflation remained the focus, despite growth concerns evident in the 1Q22 GDP data. European equities outperformed global markets (+1.0%) taking relief in incumbent French President Macron and his centre party remaining in power.

Asian equities outperformed the wider market (+0.2%) over the month. Chinese equities outperformed global and regional markets (+0.4%) stemming from supportive government rhetoric and indications of easing. This was despite the continued worries relating to COVID-19 restrictions and fresh regional lockdowns. Japan underperformed global and regional markets (-2.3%) as the Bank of Japan continued on a separate path of sustained easing with less of an inflationary pressure to tighten monetary policy.

Elsewhere, Brent Crude (+1.3% in USD) and Gold (-2.1%) were up and the US Dollar (+4.7%) was strong.

Key contributors included:

- Oil & Natural Gas cluster, notably EQT Corp and Coterra Energy contributed to portfolio performance in April fuelled by the recent surge in commodity prices. In addition, news of an LNG export agreement between the US and the European Commission was received positively, with both companies benefitting from the renewed demand outlook for US gas exports.
- Merck within the Healthcare cluster, with the company reporting robust earnings for 1Q22. The highlight was a 50% increase in sales from 1Q21, led primarily by key cancer drug Keytruda, as well as the company's COVID-19 antiviral drug and vaccines business.
- Internet Software Asia/EM, notably JD.com and KE Holdings, with Chinese technology stocks rallying towards the end of the month as China's leadership

vowed to drive economic stimulus and end speculation around the continued crackdown on internet companies.

- Consumer Cyclical Asia/EM including ICICI Bank and Trip.com. Indian based ICICI Bank rose over the month after reporting strong March quarter results. This included recording a net profit increase of 59% on prior year reporting, in addition to reporting an improvement in asset quality over the quarter. Ratios for both gross and net non-performing assets, however declined. Trip.com benefitted from stronger sentiment around Chinese stocks, particularly towards the end of the month.
- Shorts, as the market became increasingly concerned about policy tightening in the face of slowing economic growth, short positioning in weaker businesses regardless of their cyclical or secular growth profile contributed to performance.

Key detractors included:

- Internet/Software – DM cluster, notably Amazon and Compass Inc. Amazon reported its first quarterly loss since 2015, with online sales slipping 3% as pandemic induced goods consumption faded. Despite this, growth in other parts of the business, including cloud computing and advertising, remains strong. Amid a robust real estate environment in the US, real estate broker Compass Inc. detracted upon weaker investor sentiment.
- Hardware cluster, notably TSMC, with the recent pullback reflecting heightened investor concerns of a broader economic slowdown impacting the semiconductor industry. TSMC's earnings momentum and improving outlook however, continues to outperform industry peers in absolute price performance terms.
- Consumer Cyclical – DM cluster, including Flutter Entertainment who reported solid US market share gains during the month. Despite this, poorer sentiment around US based competitors weighed on the company. In addition, the company's UK and Ireland markets reported weaker revenue due to stronger gambling measures, highlighting contractions relative to pandemic comparative levels.

## Net performance (%)

	Fund	Benchmark	Difference
1 month	4.2	-1.4	5.7
3 month	-5.7	-7.4	1.6
Year to date	-1.9	-8.2	6.3
1 year	-0.8	4.5	-5.3
3 year p.a.	5.5	10.4	-4.9
Inception p.a.	3.6	9.4	-5.8

Past performance is not a reliable indicator of future performance Returns are quoted in NZD and net of applicable fees, costs and taxes. All p.a. returns are annualised.

Status	Open
Inception Date	25 July 2018
Registered in	New Zealand

<sup>5</sup> As a percentage of the net asset value of the Fund per annum (Fee rate **includes GST**). <sup>6</sup> The Performance Fee will be calculated daily in respect of a semi-annual performance period ending on 30 June and 31 December each year (or the immediately preceding Business Day if not a Business Day) (each a **Performance Period**). The performance fee above has a 'high water mark'. This means it is calculated on a cumulative basis relative to the Benchmark Index so that any performance under the Benchmark Index in a particular period must first be recovered in following periods before performance fees are paid. <sup>7</sup> When you enter or leave a Fund, any buy or sell spreads applicable at that time will be a cost to you. The buy spread is added to the Unit price on entry to the Fund, and the sell spread is deducted from the Unit price on exit from the Fund. The buy/sell spreads belong to the Fund and the purpose of buy/sell spreads is to make sure that any transaction costs incurred as a result of an investor entering or leaving the Fund are borne by that investor, and not by other investors in the Fund. There is no GST charged on buy/sell spreads.

THIS FUND FACT SHEET PERTAINS TO THE FOLLOWING:  
Antipodes Global Fund (PIE) (the "Fund")

This Fact Sheet is provided by Antipodes Partners Limited ('Antipodes') (ABN 29 602 042 035, AFSL 481580) in good faith and is designed as a summary to accompany the Product Disclosure Statement for the Antipodes Investment Funds (Funds). The Product Disclosure Statement is available from Antipodes, or the issuer Implemented Investment Solutions Limited (IIS) on [www.iisolutions.co.nz](http://www.iisolutions.co.nz), and on <https://disclose-register.companiesoffice.govt.nz/>. The information contained in this Fact Sheet is not an offer of units in the Funds or a proposal or an invitation to make an offer to sell, or a recommendation to subscribe for or purchase, any units in the Funds. If you are making an investment directly then you will be required to complete the application form, which can be obtained from the Manager, IIS. The information and any opinions in this Fact Sheet are based on sources that Antipodes believes are reliable and accurate. Antipodes, its directors, officers and employees make no representations or warranties of any kind as to the accuracy or completeness of the information contained in this fact sheet and disclaim liability for any loss, damage, cost or expense that may arise from any reliance on the information or any opinions, conclusions or recommendations contained in it, whether that loss or damage is caused by any fault or negligence on the part of Antipodes, or otherwise, except for any statutory liability which cannot be excluded. All opinions reflect Antipodes' judgment on the date of this Fact Sheet and are subject to change without notice. This disclaimer extends to IIS, and any entity that may distribute this publication. The information in this Report/Presentation is not intended to be financial advice for the purposes of the Financial Advisers Act 2008 or the Financial Markets Conduct Act 2013. In particular, in preparing this document, Antipodes did not take into account the investment objectives, financial situation and particular needs of any particular person. Professional investment advice from an appropriately qualified adviser should be taken before making any investment. Past performance is not necessarily indicative of future performance, unit prices may go down as well as up and an investor in the fund may not recover the full amount the capital that they invest. No part of this document may be reproduced without the permission of Antipodes or IIS. IIS is the issuer and manager of the Funds. Antipodes is in the investment manager of the Funds. Options exposure represents the market downside. For put options (typically used to limit potential downside) delta-adjusted exposure is used and for call options (typically used to capture potential upside) exposure is calculated using the current option value.
